

STEAMRIGHT™

SteamRight™, an innovative hermetically sealed steam-in-bag technology, optimizes precision steam cooking along with easy opening. This incredible advancement was designed for use in a variety of food applications including meals, side dishes and snacks.

In addition to precision steaming and easy opening, Alcan's unique packaging solution accepts up to 10-color print runs for maximum shelf impact – and has toughness built-in to meet performance challenges at every stage of frozen food distribution.

Exclusive SteamRight Features and Benefits

PRECISION STEAM COOKING & EASY OPENING

Steam vents created in our laser scoring process have been specially designed with built-in tolerances that ensure steam release occurs flawlessly – at just the right moment while heating – resulting in food that is cooked to perfection.

The same scoring technology that provides our precision steam venting also produces its easy opening functionality, allowing the end user to effortlessly tear open the package.

10-COLOR PRINTING

Outstanding shelf appeal in crowded retail spaces is paramount when competing for increased sales. SteamRight allows you to sell right too, with print capabilities of up to 10 colors for unmatched brilliance in packaging.

This fantastic print range allows your package designers the freedom to create impact with additional color choices. SteamRight gets you the appearance you need to help move your products out of store clutter – and into check out baskets.

DISTRIBUTION TOUGHNESS

SteamRight is not only technologically superior and great looking, but is also designed to possess unmatched toughness. Standing up to punishing conditions commonly found in frozen food distribution is important because strong packaging materials and seals protect both food – and profits.

From food processing plants to shipping to retail stock handlers, hermetically sealed SteamRight stays in great shape throughout.
